

What is the availability of the WisDom GSM cellular (AGM) module?

The manufacturer of the WisDom system has developed a very advanced GSM cellular add-on module for the WisDom. **It is now available! Click here to order:** [Rokonet WisDom Advanced GSM/GPRS Cellular Module](#)

The Advanced GSM/GPRS Modules (AGM) will be able to send text messages of alarm events and will have a sophisticated "pre-alarm notification" feature which means that even if your WisDom control panel gets destroyed, this cellular module will still be dialing out even without the WisDom's functionality. It is also a great way to protect yourself against phone line sabotage.

This unit accepts SIM cards from AT&T and T-Mobile.

This unit can also be monitored by [Alarm Relay](#) if you wish to have a UL listed central monitoring station monitor your equipment. (Requires cellular broadband plan and additional monitoring fees).
