

I need a flood control device that will cut the electrical power to a device (like a well pump) when a water leak is detected.

The [FloodStop Automatic Shut-Off Valve](#) in conjunction with the [Furman Remote Power Relay](#) will be perfect for your situation.

Under this setup, upon leak detection, the [FloodStop Valve](#) would shut off the water, and at the same time the [Furman Remote Power Relay](#) would shut off the power, and the FloodStop can even be hooked up to your security system or [Sensaphone](#) so that you are notified of the event.
